Russ, That sounds fine. A couple of notes. When you order the base rock, call the Buying Unit Team and get a P-Number, so that it can be tracked. I will alert the BUT what we are doing.

After they get an estimate for the road repairs, it needs to come to me from the Odd Fellows, as their request/claim for payment. If we can get this done before Sept. 13, I can approve it before I go on A/L for a month. Otherwise, approval will have to wait till late October, when I get back. -Thad

Thanks for your reply, here's what I will try to do if it's ok with everyone? I will order the 50 cy of road base through the BPA with A&L Trucking and have it stockpiled at Odd Fellows for there use in building up damaged road shoulders,I will charge this to the Rogge Fire #P57524 and document that the Park agrees to do the work them selves. I will coordinate with the Park caretaker to have a small paveing contractor like (T.C. Striping) give them a bid on the damaged sections of pavement as a result of our Base Camp operations. This bid will be submitted to FS contracting in the form of a claim? to be payed to Odd Fellows Park. With money in hand they can then close out the Land Use Agreement? and get the road repaires done at there leisure.... make any sense??.....RL
