- a. Samples required per 22, CCR, Section 64423;
 b. Extra samples required for systems collecting less than five routine samples per month that had one or more total colliform positives in previous month;
 c. Extra samples for systems with high source water turbidities that are using surface water or groundwater under the direct influence of surface water an do not practice filtration in compliance with requisitors.
- 2. Note: For a repeat sample following a total colliform positive sample, any fecal/E. coli positive repeat (boxed entry) constitutes an MCL violation and requires immediate notification to the Department (22, CCR, Section 64426.1).
- 3. Note: For a repeat sample following a fecal/E. coli positive sample, any total coliform positive repeat (boxed entry) constitutes an MCL violation and requires immediate notification to the Department (22, CCR, Section 64426.1).
- 4. Total collium MCL (Notily Department within 24 hours of MCL violation):
 - a. For systems collecting less than 40 samples, if two or more samples are total coliform positive, then the MCL is violated.
 - b. For systems collecting 40 or more samples, if more than 5.0 percent of samples collected are total coliform positive, then the MCL is violated.
- 5. Positive results and their associated repeat samples must be tracked on the worksheet on the other side.
- 6. For systems collecting more than one routine sample per month, three repeat samples must be collected for each total colliform positive sample. Repea samples must be collected within 24 hours of being notified of the positive result.
